Stroke Program

A NOTE FOR THE ADULTS:

WHAT IS THE UAMS INSTITUTE FOR DIGITAL HEALTH & INNOVATION STROKE PROGRAM?

The University of Arkansas for Medical Sciences (UAMS) Institute for Digital Health & Innovation (IDHI) Stroke Program uses live, two-way video calls to connect emergency room doctors to specially trained stroke doctors all day, every day. This makes sure that people having a stroke get the life-saving treatment they need fast! This program is available in most hospitals around Arkansas!

Ischemic strokes, the most common type of stroke, are caused by blood clots blocking blood flow in the brain. These can be treated using a clot-busting medication that dissolves the blood clot. Anyone who has any of the stroke symptoms from BE FAST needs to call 911 and get to a hospital quickly. Treatment must happen quickly to help save the brain! To learn more and see a list of participating hospitals in the Telestroke Program, visit <https://idhi.uams.edu>
