

TBI Advisory Board Workgroup Retreat

Camp Aldersgate, Little Rock

February 5, 2019

The mission of this advisory board workgroup is to improve upon Arkansas' TBI infrastructure in an effort to maximize independence, wellbeing, and health of persons with TBI, their caregivers, families, and providers.

The purpose of this retreat is to collaborate within sub-workgroups in an effort to identify the needs of TBI survivors, their families, and their support systems; work to implement solutions that address known gaps in resources and services; and promote survivor engagement. Efforts and outcomes will support the development of an Arkansas State Plan and grant deliverables for the Administration for Community Living (ACL) Traumatic Brain Injury (TBI) State Partnership Program (SPP).
